# FLAT PACK DETACHABLE CONTAINER

A detachable container is a cost-effective, easily assembled temporary structure with a safety steel frame and insulated material cover. It requires minimal labor and simple tools for construction, eliminating the need for machines or cranes, making it ideal for remote sites without power or heavy equipment.

## Standard one size (4 Workers +3 Hours = 1 House)

| Detachable Container | Length | Width | Height | Area | Weight |
|---|---|---|---|---|---|
| Size | 5950mm | 3000 mm | 2840 mm | 17.85㎡ | 1250 kg |
