WHY MOUDULAR COLONY?

Modern Designs

We have a great team of engineers who are working dedicatedly to create functional designs to meet the customer's demand. We specialize in the modern designs for the workmen colony and ensure high quality with all the necessary facilities.

Durability

Construction projects may last from a few months to years. In that case, RNC makes sure that the houses have durable designs and material so that it can stay intact until the project is on. The materials that we use in the construction are reliable. Hence, durability is something that our customer doesn't have to worry about at all.

Zero Maintenance

A good workmen colony is something that doesn't need additional maintenance. At RNC, make sure that our workmen colony stands on own and don't require our customers to shed in extra money to maintain the colony. Based on the project time, we suggest the most suitable construction for our clients to fulfill their needs.

Energy Efficient Construction

When it comes to workmen colony, we like to make these houses profitable for our customers. We make sure to construct the workmen colony that are energy efficient and utilizes the natural source at its best. Our designs are energy efficient and are budget friendly.

Environment-Friendly

Every design, material, and construction in our workmen colony service is environment-friendly. We ensure that construction doesn't harm the environment and construction materials are reusable. We provide proper sanitation facility for a healthy and sustained living for the workmen and their families.

Easy To Detach

Workmen colony is a temporary arrangement, which needs to be removed after the project finishes. Therefore, we ensure that our workmen space can be easily removed without putting much effort and time. It is one of the most important features that every builder wants in their workmen colony.
